ADVANCED DIGESTIVE ENDOSCOPY

International Endoscopy Workshop
with live video teleconferencing

June, 30 – July, 1, 2014

WORKSHOP INFORMATION

Dear Colleagues!

*The field of therapeutic GI endoscopy has been advancing day-by-day with the advent of new technologies and techniques. We are delighted to invite you to the 14th Annual Yaroslavl Endoscopy Symposium “**Advanced Digestive Endoscopy - YES 2014**” on June, 30 - July, 1, 2014.*

The overall goal of this Workshop is to provide information about current technologies and to enhance knowledge in diagnosis and treatment of GI tract diseases. The major teaching advantage of YES-2014 is the combination of live demonstrations of standard and advanced endoscopic procedures, state-of-the-art lectures and hands-on-training on animal models simulators.

The highlights of the conference will be the demonstrations of advanced therapeutic technologies: new HybridAPC ablation of Barrett’s Esophagus, cricopharyngeal myotomy for Zenker’s diverticulum, novel EMR and ESD techniques in esophagus, stomach and colon, advanced pancreatobiliary endoscopy. The audio-visual transmission will be broadcast live from the endoscopic operating theatre of the Yaroslavl Regional Cancer Hospital. All the procedures will be performed by internationally renowned and brilliant experts.

YES 2014 will allow participants to gain hands-on exposure to advanced endoscopy techniques and devices, utilizing a combination of ex-vivo animal models (pig stomachs) and simulators for training. Gastroenterologists and GI residents, GI surgeons and radiologists, as well as general practitioners and medical students are all welcome to YES 2014. Russian and English will be the official languages of the Workshop.

Welcome to Yaroslavl!
